

# Soybean cyst nematode-resistant soybean varieties for Iowa

---

Soybean cyst nematode (SCN) is a widespread pest of soybeans in Iowa. The nematode is a serious threat to soybean production because it reproduces very quickly, survives in the soil for many years in the absence of a soybean crop, and can cause substantial yield losses, particularly in dry years.

Resistance is a very effective strategy for managing SCN, and resistant soybean varieties now are widely available in all maturity groups grown in Iowa. Resistant varieties produce acceptable yields yet suppress reproduction of the nematode. Currently, there are three main genetic sources for SCN resistance genes in commercial soybean varieties, namely PI88788, Peking, and Hartwig. Additionally, one variety with resistance genes from PI209332 is available.

All of these sources of SCN resistance allow limited reproduction of only a few nematodes. Limited reproduction by a few nematodes on a resistant soybean variety does not pose a problem in a single growing season. However, if soybean varieties containing the same source of resistance are grown repeatedly for many years, there is the potential for build-up of a population of nematodes that readily feed on that source of resistance. Thus, use of resistant soybean varieties, particularly any single SCN-resistant variety, should not be considered the sole solution for managing SCN. Instead, Iowa State University recommends growing nonhost crops, such as corn, in conjunction with soybean varieties with different sources of resistance in a crop rotation scheme to discourage the build-up of nematode populations that reproduce readily on resistant soybean varieties. Refer to Iowa State University Extension Publication PM 879, *Soybean Cyst Nematode*, for more information about biology and management of the nematode.

The following list is a compilation of soybean varieties in maturity groups I, II, and III that are advertised as having resistance to SCN. The resistance ratings reported here were provided by the seed companies offering these varieties for sale. Iowa State University has not verified the resistance claims. Different seed companies may use different criteria and have data from different locations, so it is not recommended to use these ratings for comparisons between companies. Keep in mind that companies may not use the same standards to develop these ratings.

Varieties are arranged by maturity group and brand.

## Disclaimer

This list is not complete. Although sincere effort was made to contact all companies offering SCN-resistant soybean varieties for sale in Iowa, numerous companies that were contacted did not respond to our request for information. It is acknowledged that some companies may have been overlooked in this effort. However, no company was intentionally excluded. If you represent a soybean seed company and your varieties are not listed, please contact us so that we can correct the omission.

This information has been provided to us by seed companies and has not been verified by Iowa State University. We do not warrant or guarantee the standard of any variety listed. Also, no endorsement is intended of listed varieties, nor is criticism implied of varieties not listed. Neither Iowa State University nor its faculty or staff may be held responsible for damages resulting from the use of this information.

The 2001 *Soybean cyst nematode-resistant soybean varieties for Iowa* publication is brought to you, in part, by the Iowa Soybean Promotion Board . . . investing checkoff dollars!

Prepared by Gregory L. Tylka, extension plant pathologist, Department of Plant Pathology, Iowa State University.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Many materials can be made available in alternative formats for ADA

clients. To file a complaint of discrimination, write USDA, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue SW, Washington, DC 20250-9410 or call 202-720-5964.

Issued in furtherance of Cooperative Extension work, Acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture. Stanley R. Johnson, director, Cooperative Extension Service, Iowa State University of Science and Technology, Ames, Iowa.
